## FUNDING

2020 – 2022	Quantifying secondary health impacts of COVID-19 Google.org Co-investigator (PI: Jennifer Stevens) <i>The goal of this project is to quantify the impact of COVID-19 on non-COVID-associated healthcare. A fundamental hypothesis is that preventive care and routine care will be delayed and deferred, leading to subsequent increased healthcare utilization.</i>
2018 – 2021	A new approach to patient safety: identifying risky clinical states to reduce preventable harms for hospitalized patients Doris Duke Charitable Foundation Collaborator (PI: Jennifer Stevens) <i>Our proposal developed and refined a tool to quantify the level of risk of preventable patient harms in intensive care units, prospectively validated this tool, and spread this tool to a new clinical environment.</i>
